

RAHUL

Web Designer — Landing Pages & Cinematic Web Experiences

Haryana, India · your@email.com · Self-taught

SUMMARY

Self-taught web designer building premium, motion-driven web experiences — landing pages and cinematic, scroll-driven sites that make a brand feel unmistakably high-end. I approach every build with a storytelling mindset, communicating ideas clearly in both code and conversation, with a focus on pacing, restraint, and performance.

SKILLS

Languages & Tools	Python · Java · JavaScript · TypeScript · React · HTML5 · CSS3
Platforms	Firebase · Supabase · Git · GitHub
Craft	HTML5 Canvas API · Scroll-driven Animation · Motion Design · Responsive Design
Frameworks	Tailwind CSS · Framer Motion
Professional	Clear Communication · Client Communication

SELECTED PROJECTS

- **Salon — Cinematic Scroll Experience**
Fully responsive, scroll-driven frame-by-frame product film built with HTML5 Canvas and a custom scroll-sync engine.
- **Pizza — Cinematic Product Site**
Multi-video scroll sequence (2100vh depth) recreating an Apple-style product reveal for a pizza brand.
- **Chocos — Cinematic Brand Site**
Scroll-controlled cinematic animation built for a Kellogg's Chocos concept site.

EDUCATION

MDU University
